Cylchgrawn y Dewiniaid Digidol

Y diwrnod daeth Vince i 5C....

Ar y 15fed o Hydref, daeth Vince o STEM Cymru i wneud bach o côdo gyda ni gan ddefnyddio Microbits. Buon ni'n côdo car sut i symud.
Yn gyntaf roedden ni'n côdo'r car i symud ar ben ei hunan ac ar ôl hynny rhoddon ni ein ceir mewn *arena* bach i weld beth roedden ni angen gwella gyda'r car. Yna roeddwn ni angen trio cael y car i wneud dawns fach. Nesaf, cafon ni microbit arall sef *'controller'* ac roedd rhaid i ni côdo'r car a'r *'controller'* i weithio gyda'i gilydd i symud y car.
I orffen, rhoddon ni y ceir i gyd yn yr arena ac ymladd i weld pa gar bydde dal yn yr *arena* ar ddiwedd y pum munud.

On the 15th of October, Vince from STEM Cymru came to do some coding with us using Microbits. We coded a car how to move.
First we coded the car to move alone and then we put our cars in a small arena to see what we needed to improve with the car. Then we needed to get the car to do a little dance. Next, we got another microbit called a 'controller' and we had to code the car and the controller to work together to move the car.
Finally, we put all the cars in the arena and they fought to see which car would still be in the arena at the end of the five minutes.
