Taith BI 6 i Big Pit Amgueddfa Lofaol Cymru / Year 6's trip to Big Pit National Coal Museum

Ar ddydd Iau 21ain o Hydref aeth bws llawn o blant cyffrous blwyddyn 6 i Bwll Mawr, Amgueddfa Lofaol Cymru. Diwrnod braf, ond oer oedd hi!

Wedi cyrraedd aethon o amgylch yr amgueddfa. Yn gyntaf aethon ni ar helpa gwybodaeth. Gwelon ni hen ofer fel Cloddiwr Dragline, Dril mwyngloddio a Liff Craen.

Ydych chi'n gwybod?

Roedd Pwll Mawr wedi agor yn 1880 a chaeodd yn 1980.

Ar ôl bwyd aethon ni lawr i liff i'r pwll. Teimlon ni'n oer wrth fynd i lawr i'r dyfnderoedd. Aethon ni lawr mewn cawell gan symud 5 milltir yr awr. Gwelon gart mwyngloddio pren, mawr gyda stribedi diogelwch mhetal. Gwelon y lle ble'r oedd y ceffylau yn byw. Nid oedden nhw'n gweld golau dydd o gwbl. Darganfyddwn ni llawer am y glo, am sut cawsom nhw'r glo lan i'r top a phan ddaethon ni allan gwelon ni adar bach melyn - y caneri.

Defnyddiwyd y caneri i weld os oedd nwy yn y pwll. Os oedd yr aderyn bach yn mynd yn dawel yna roedd y dynion yn gwybod efallai fod yna nwy peryglus yn yr aer.

Wedyn aethon ni i'r profiad 'King Coal'. Yma dwedodd yr arweiniwr llawer am y Peiriannau defnyddiwyd o dan y ddaear. Cerddon ni o amgylch gan wrando ar gyfres o raglenni yn dweud popeth am y peiriannau.

Yn olaf aethon i'r siop wedyn mynd nôl i'r ysgol. Cawsom ni ddiwrnod arbennig.

On Thursday 21st of October Year 6 went to the Big Pit Coal Museum.

A bus full of excited children went from Ysgol Gwaelod y Garth on a nice but cold day!

On arrival we went around the museum. First we went on an information hunt. We saw old machines such as a dragline excavator, a mining drill and a crane lift.

Did you know? The Big Pit opened in 1880 and closed in 1980.

Next we then went down the pit itself. We felt it getting colder as we went deep down in to the mine. We went down in a cage lift at a speed of 5 miles per hour. We saw where the horses lived. They didn't see the day light at all. We found a lot out about coal and how they got the coal up to the top. After that we went up and saw the canaries. They used the canaries to test the air for gas. If the bird went silent they knew there would be gas.

Then we went to the King Coal experience. The man told us about the machines used down the pit. Next we walked round the place with a man on television telling us everything about the machines.

Lastly we went to the shop and then went home. We had a wonderful time.
